Annual company statistics (Esane) 2021		Supply balances 2022-2023	
Organic farming and other official quality signs			
 Organically farmed areas 61,163 farmers (14.0% of farms' UAA)	 Organic areas 2.8 million ha (10.4% of UAA)	 Number PDO/PGI⁵ agrifood: 257 wine: 438	 Label Rouge: 439 products STG⁶: 3 specialities
Agence Bio 2023		European Commission 2022	
Forestry - Wood			
 Forestry 18.5 million ha (Metropole)* 7.9 million ha (DOM)**	 Wood harvested and sold 39.9 million cu.m.	 Sawn timber, wood staves and wood sleepers 8.6 million cu.m.	 Forestry holdings and sawmills 3,062 French companies
Teruti 2020	Annual Sectoral Surveys of Forestry Holdings and Sawmills 2022		

* Metropolitan France ; ** French overseas departments. 1. Full-time equivalents ; 2. Gross operating surplus ; 3. Fresh or processed ; 4. All meats in carcass equivalent: cattle, pigs, sheep and goats, poultry ; 5. Protected Designation of Origin/Protected Geographical Indication ; 6. Traditional specialities guaranteed.
 Scope: France unless otherwise indicated.

The essentials about French agriculture

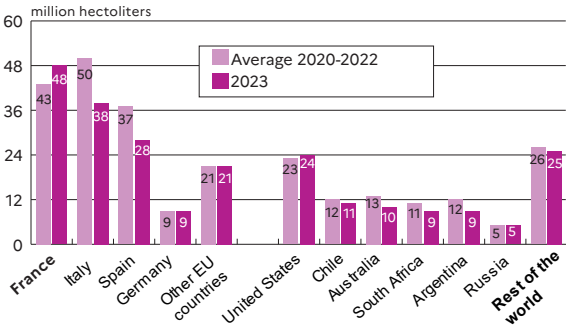

French wine production in Europe and the world

In 2023, **world wine production** (excluding juice and must) is estimated at **237 million hectoliters**. The European Union remains the main contributor to this production (61% of the total).

Within Europe, French wine production (including juice and must) stands at 47.6 million hectoliters. Thanks to its increased harvest in 2023, **France is now the world's leading wine producer** by volume (20% of the global total), ahead of Italy (16%). **France remained the highest-value exporter**. France is **the world's leading grower of organic vines** in terms of surface area, with recent conversion trends, particularly in the vineyards of Champagne and Bordeaux in 2021.

Annual global wine production: 237 million hectoliters in 2023

GRAPH'AGRI (reference work)

MÉMENTO (English version)

TO BE PUBLISHED SOON

Updated annually

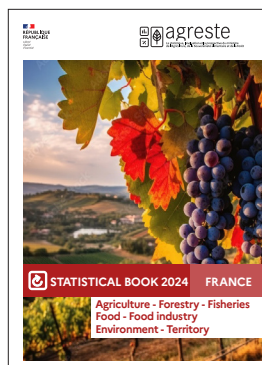

A veritable encyclopaedia, the **GRAPH'AGRI** collection is an invaluable source of a valuable source of statistical information on **agriculture, forestry, territory, food, fisheries and food industry**.

You will find...

Through a succession of themes, a summary of the latest information available. Presented in the form of tables, graphs and maps, and is accompanied by comments to make it easier to read.

... data from agricultural and food statistics

- ▶ departmental and regional;
- ▶ comparison with Europe.

Based on data from the book **GRAPH'AGRI**, the **MÉMENTO** collection brings together the latest and most significant information on agricultural and food diversity.

This is an essential tool to enable everyone to better understand these statistics.
